CanDis_2026_Sample1 | no edge => no margin / core; hatching = band unresolved

Half-width 100 um | same new geometry

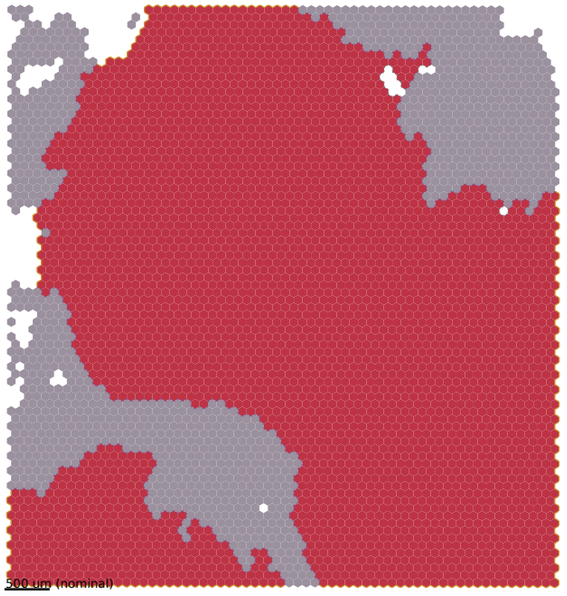

Inside; outer edge unobserved
Extent unresolved

Half-width 200 um | same new geometry

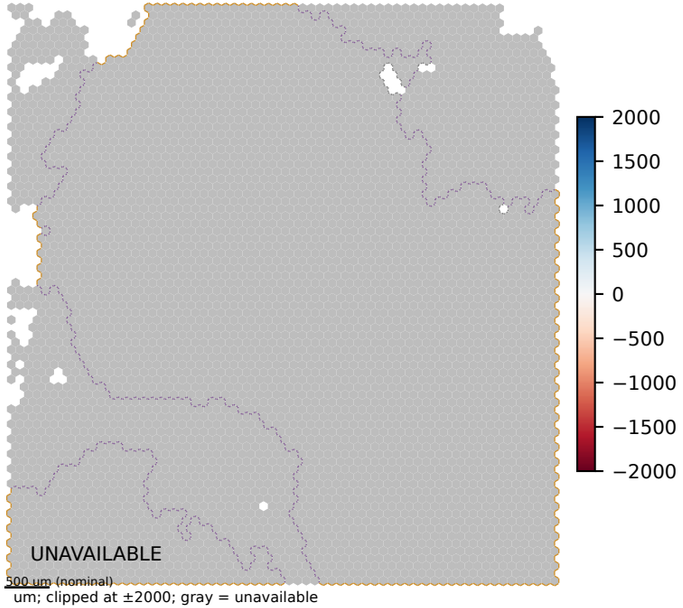

Inside; outer edge unobserved
Extent unresolved

Half-width 300 um | same new geometry

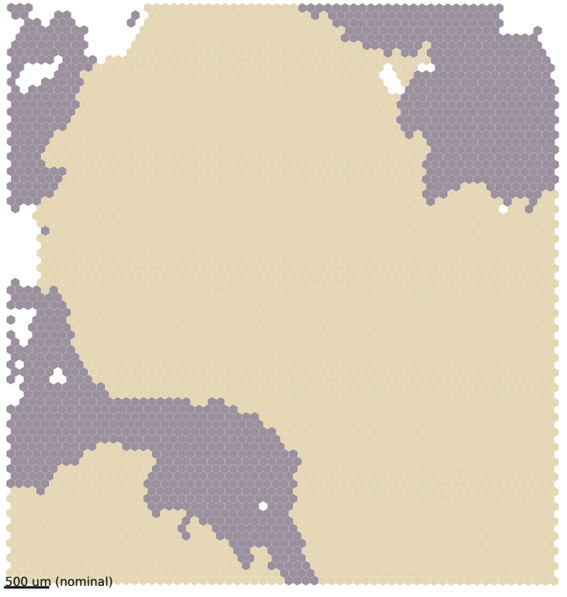

Inside; outer edge unobserved
Extent unresolved

Exact signed distance; red inside / blue outside

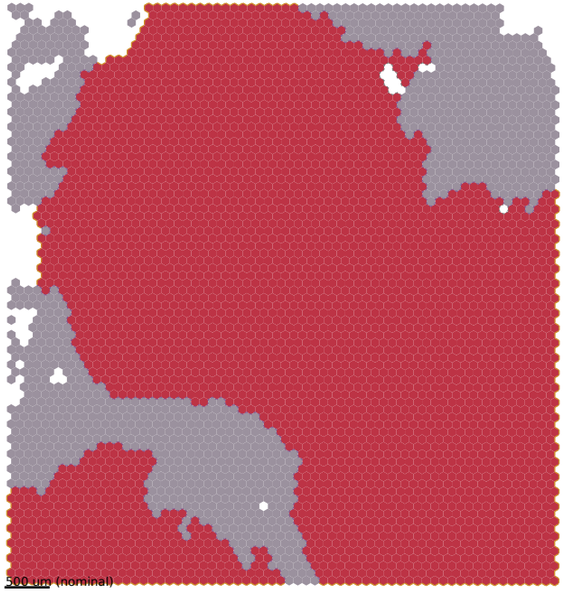

um; clipped at ±2000; gray = unavailable

Exact-distance reliability

outer_edge_not_observed
extent_unresolved

Position retained when no outer edge is observed

Inside lesion ROI (computational)
Extent unresolved (not outside)
