GSE319536_BC01 | author comparison is qualitative, not segmentation accuracy

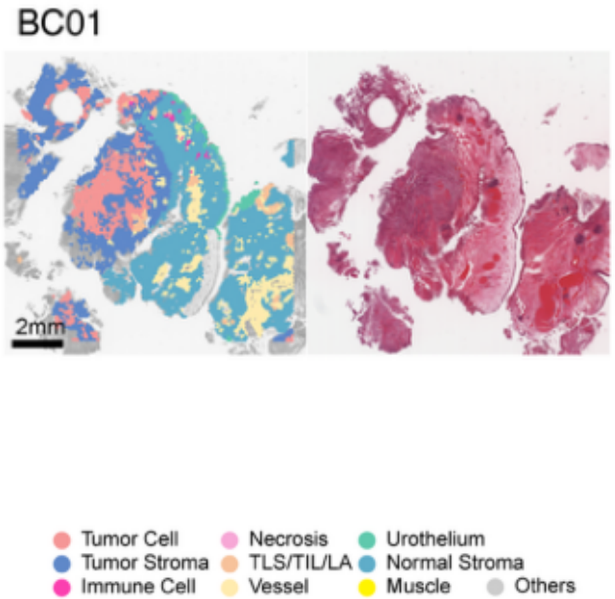

v3.1 (project coordinates)

v3.2 (same project coordinates)

Published S1 annotation + H&E
Separate figure scale; NOT registered barcode labels

S1 contains Tumor Cell/Tumor Stroma in the left/central tissue and extensive Normal Stroma on the right/lower side. Fragmentation and holes are visible. Molecular-only boundary cannot establish the exact macro transition; unresolved areas are retained.
