NPJ_sample1 | 2,076 Visium spots | Epi-rich edges, no pathology confirmation

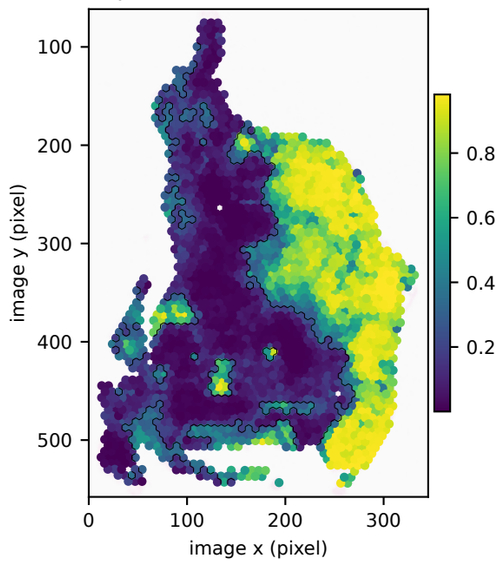

H&E + retained tissue support

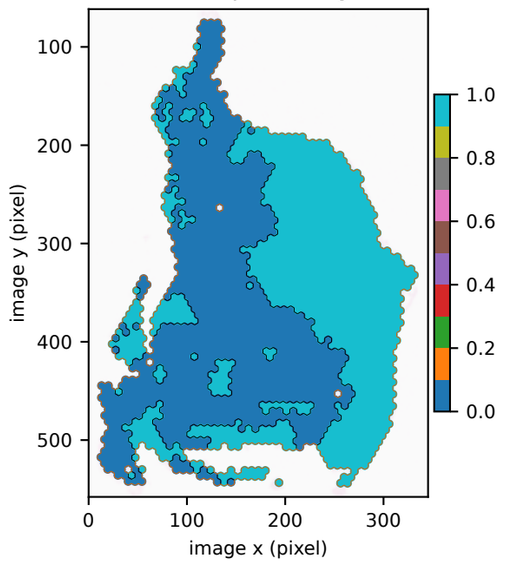

CopyKAT spot MSQ (diagnostic)

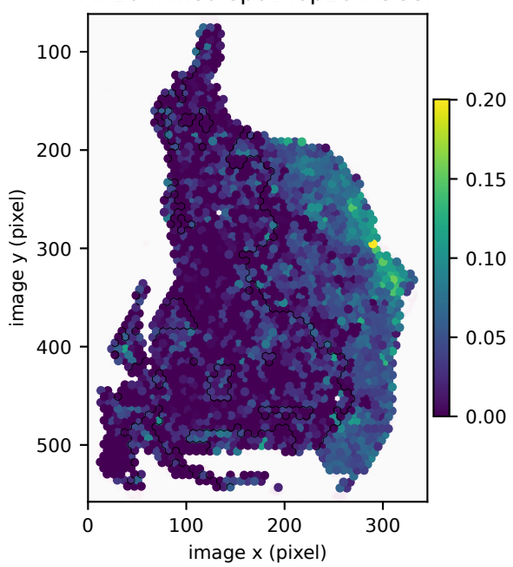

Epithelial modeled fraction

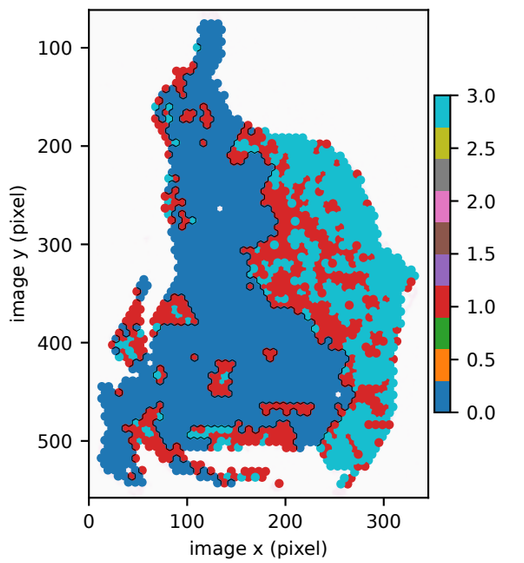

Derived Epi-rich regions

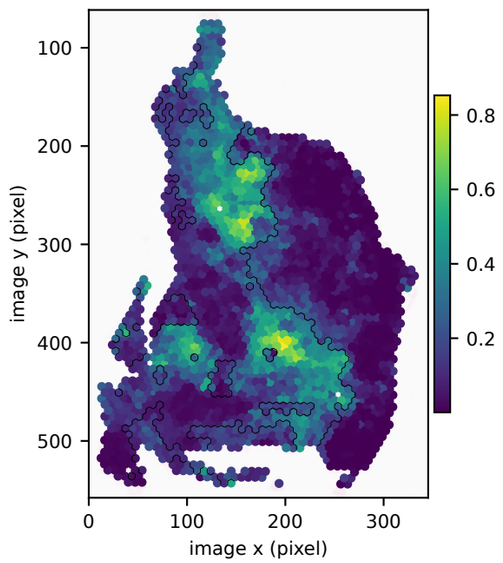

MP10 mixed-spot Top20 AUCell

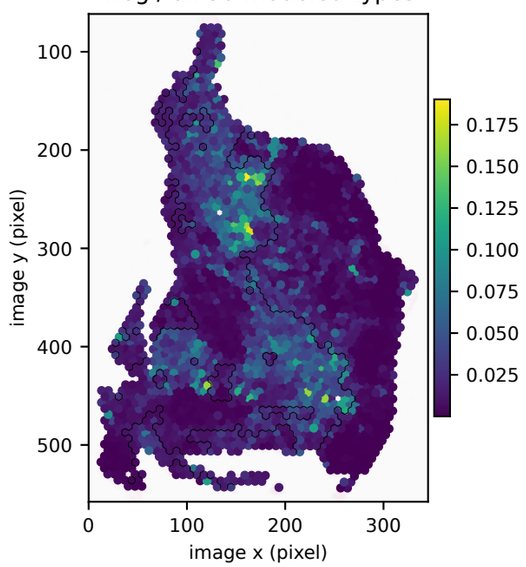

MP10 relative anchor state

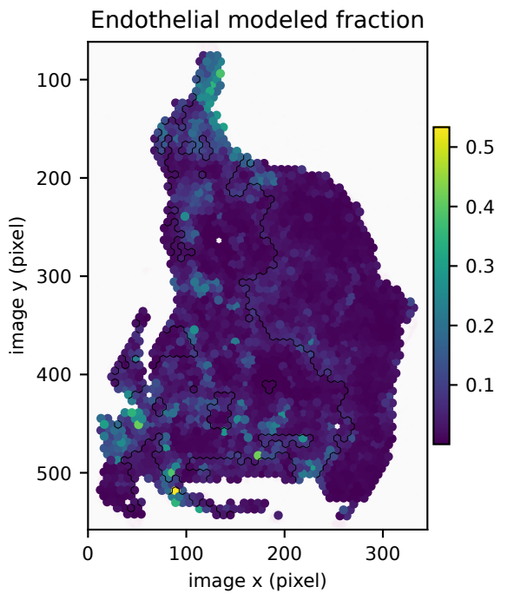

T/NK modeled fraction

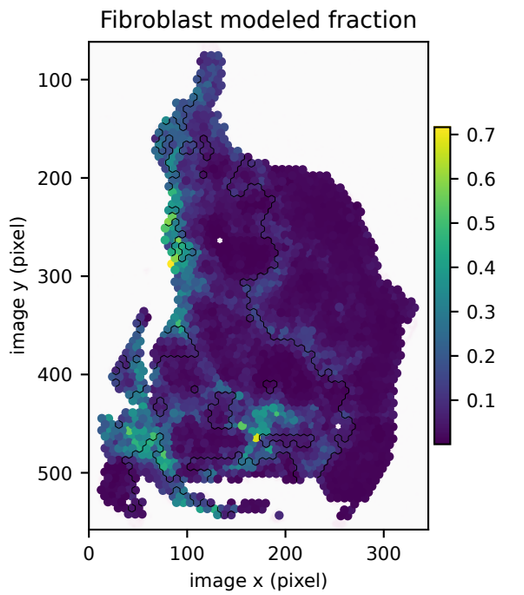

Treg / all 30 modeled types

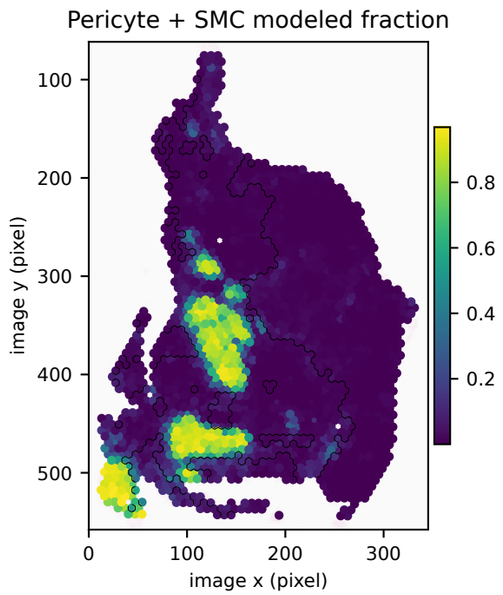

Endothelial modeled fraction

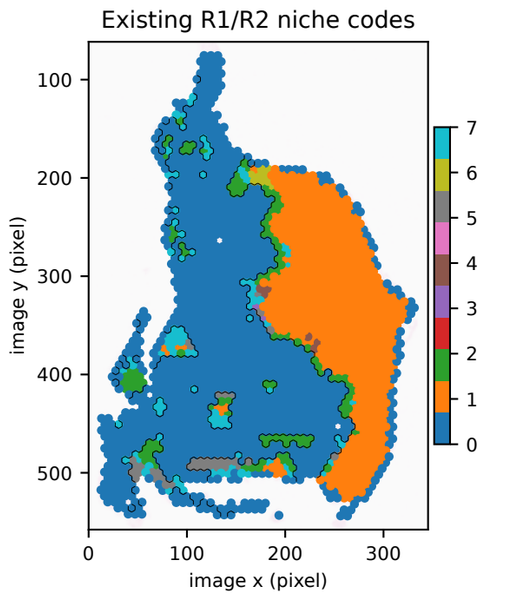

Fibroblast modeled fraction

Pericyte + SMC modeled fraction

Existing R1/R2 niche codes

Black: valid Epi-rich interface. Orange: unsupported tissue/QC/cut edge. CNV baseline unvalidated. Fractions are modeled composition.
MP10 state codes: 0 non-anchor; 1 relative low; 2 tied; 3 relative high. Niche codes are display-only; mapping in table.
