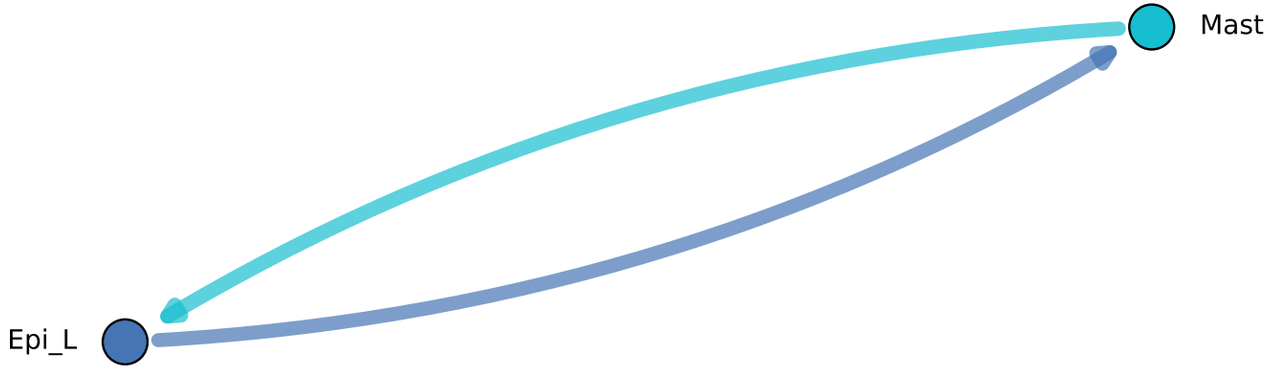
COMMOT | GSE171351_A1
Visium spot | fine Mast | Low
Total interaction strength



G: abundance-weighted cross-spot mean: shared High/Low/Both linear width scale; max = 0.0237032

0.005926 0.01185 0.0237

Epi_H/L = epithelial components in MP10-high/low-associated anchor spots; shared TME composition

All included protein LR (3 classes); c2l proportion-weighted cross-spot attribution from mixed measured expression.
Types expressible in the reference only; scales differ across panels; neighbour contact does not prove membrane contact.
