
G: abundance-weighted cross-spot mean: shared High/Low/Both linear width scale; max = 0.00555497

0.001389 0.002777 0.005555

Epi_H/L = epithelial components in MP10-high/low-associated anchor spots; shared TME composition

All included protein LR (3 classes); c2l proportion-weighted cross-spot attribution from mixed measured expression.
Types expressible in the reference only; scales differ across panels; neighbour contact does not prove membrane contact.
