
G: abundance-weighted cross-spot mean: shared High/Low/Both linear width scale; max = 0.0056166

0.001404 0.002808 0.005617

Epi_H/L = epithelial components in MP10-high/low-associated anchor spots; shared TME composition

All included protein LR (3 classes); c2l proportion-weighted cross-spot attribution from mixed measured expression.
Types expressible in the reference only; scales differ across panels; neighbour contact does not prove membrane contact.
