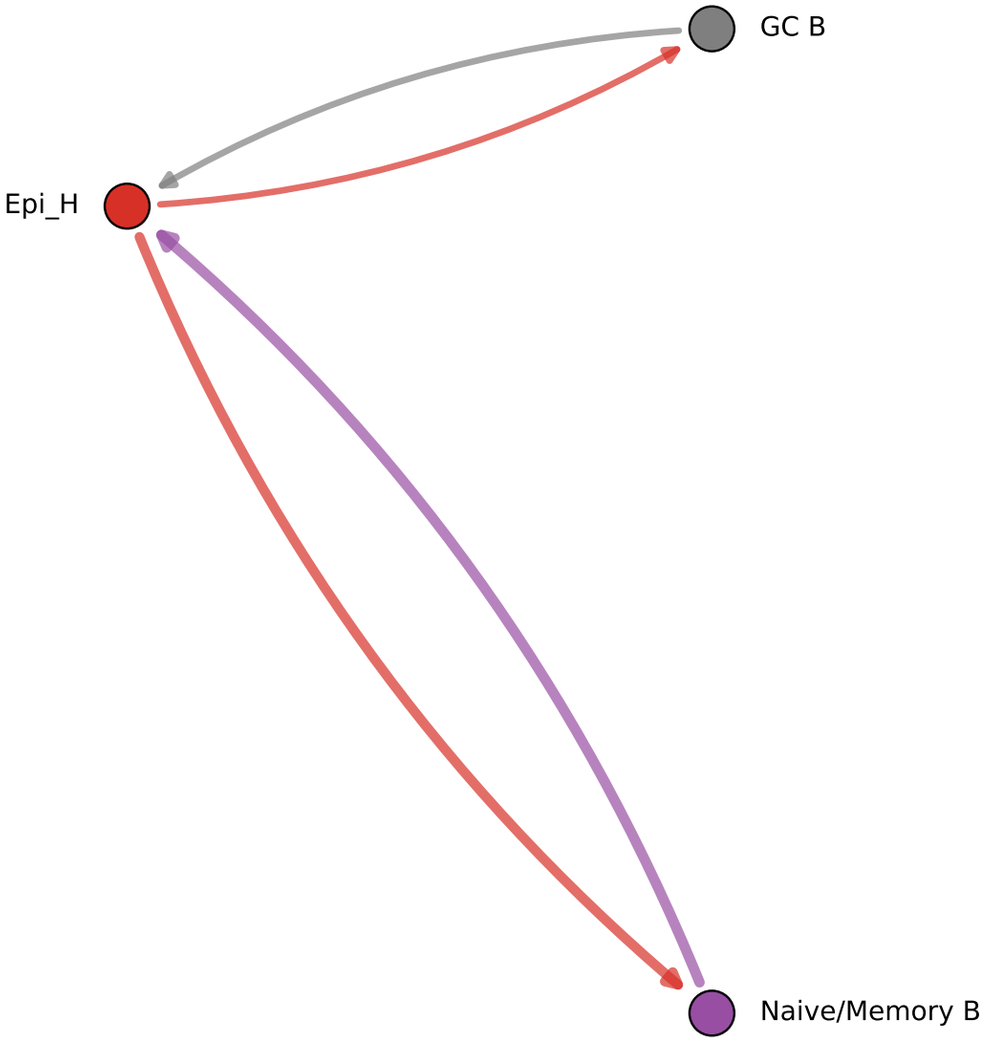
Total interaction strength



Total mean strength: sum of LR F/K: shared High/Low/Both linear width scale; max = 1.21519

0.3038 0.6076 1.215

Epi_H/L = epithelial components in MP10-high/low-associated anchor spots; shared TME composition

All included protein LR (3 classes); c2l proportion-weighted cross-spot attribution from mixed measured expression.
Types expressible in the reference only; scales differ across panels; neighbour contact does not prove membrane contact.
