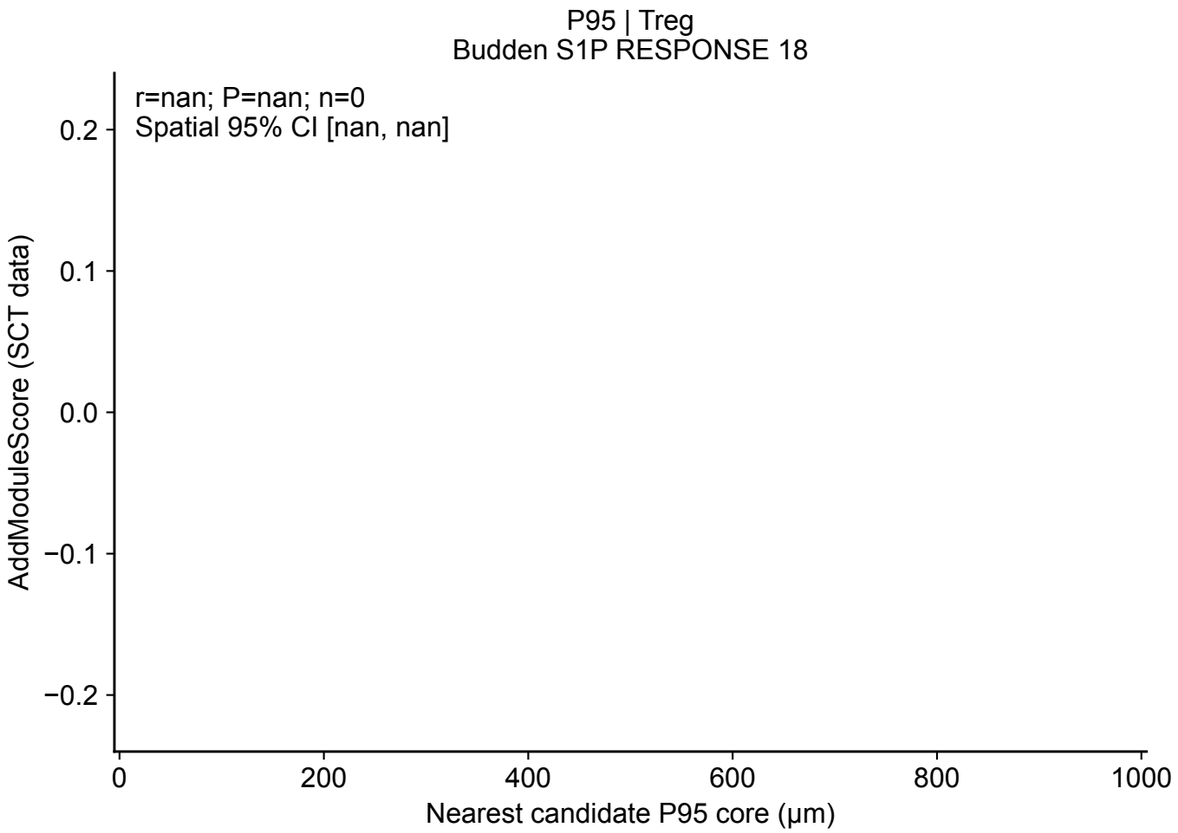
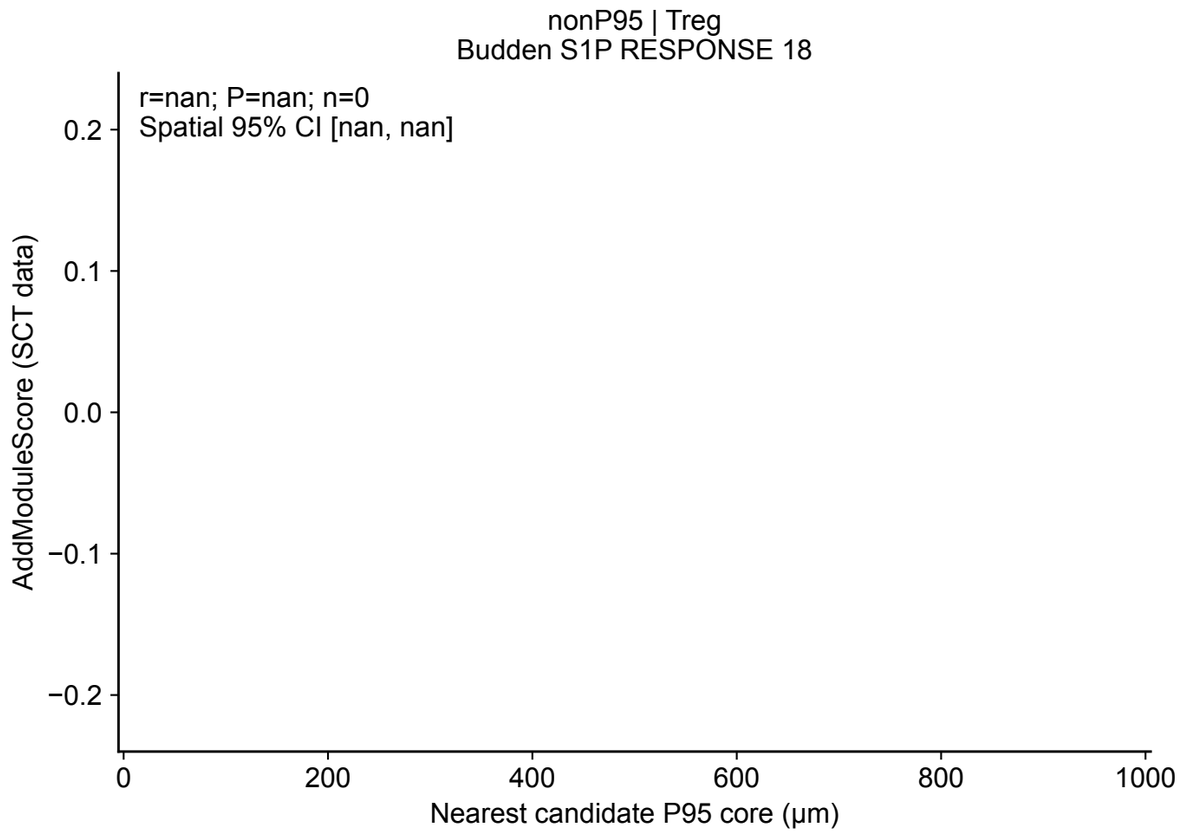
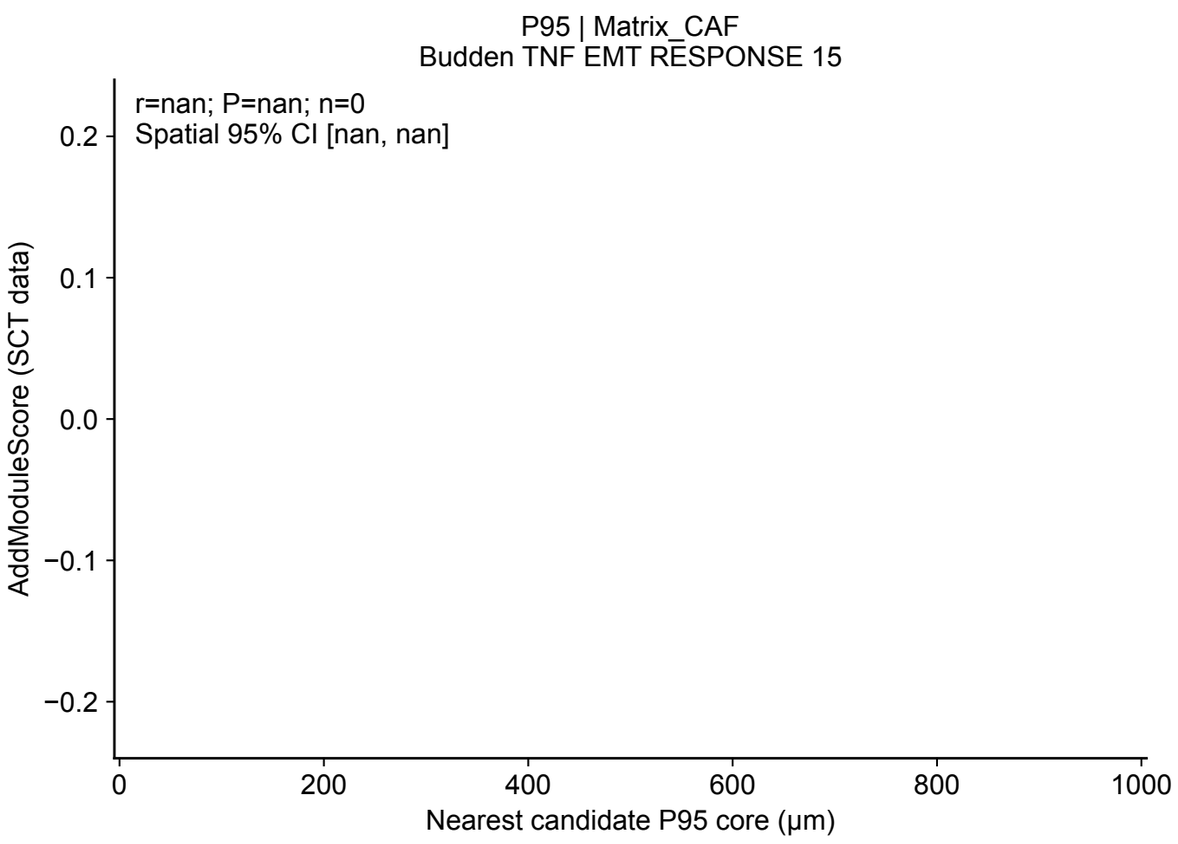
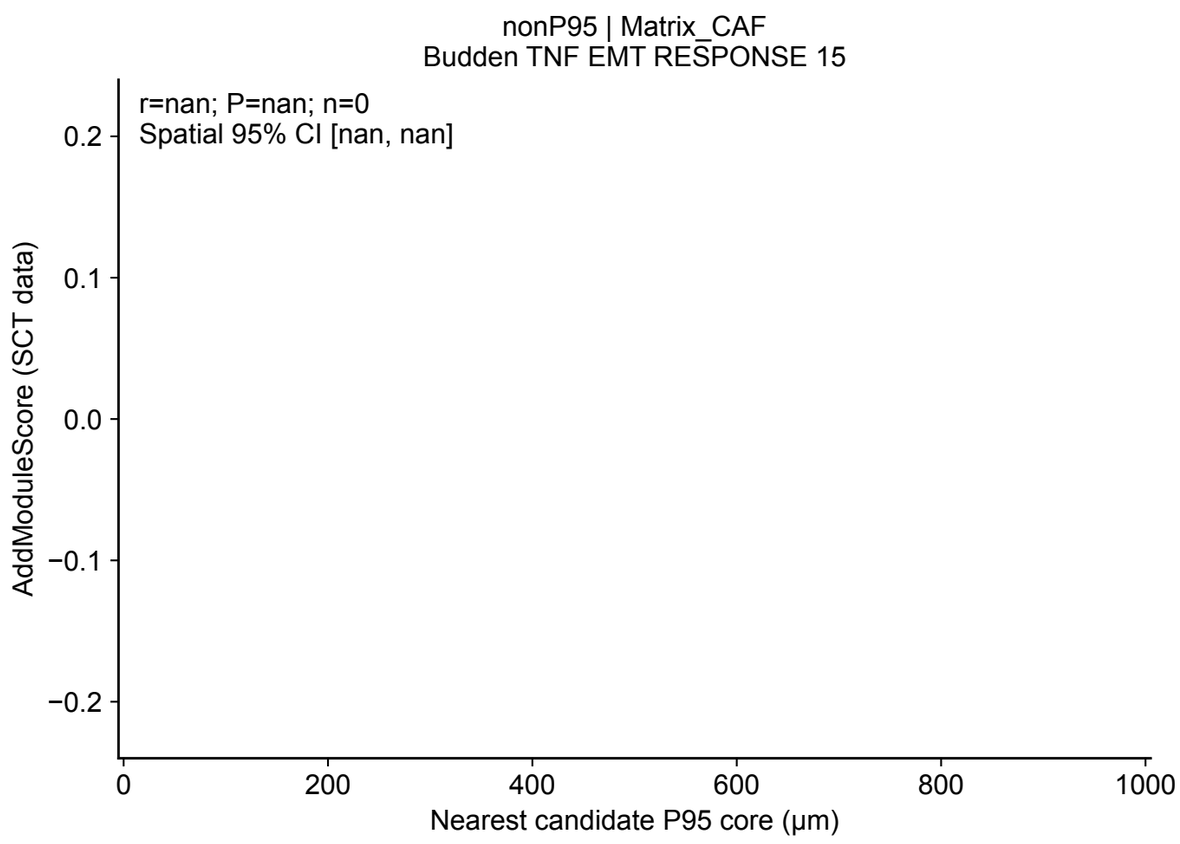
GSE171351_D1 | raw spot Pearson | full observed candidate-distance range (no clipping)









Treg / Budden S1P RESPONSE 18: descriptive full-range delta r=nan; each group retains its full observed range.
Matrix_CAF / Budden TNF EMT RESPONSE 15: descriptive full-range delta r=nan; each group retains its full observed range.
Common-support formal comparison is separate in the 3-page main report. Pearson P does not correct spatial dependence.
